PROFESSIONAL SUMMARY

Team-oriented software engineer with **10+ years experience** building multi-tier, distributed systems and consumer products; delivered high-volume platforms (**50M+ daily transactions**), REST APIs, and zero-downtime releases via CI/CD; proficient in Golang with MySQL, BigQuery, AWS, Kubernetes; employs clean code practices and TDD.

WORK EXPERIENCE

- Grab – Senior Software Engineer, Backend** Singapore, Jun 2022 – Present
- Built **Slack and Atlassian MCP automations** that removed repetitive on-call workflows, saving engineers **3 hours per week**.
 - Revamped platform onboarding with **natural-language input** backed by LLMs, cutting a 2-day manual process to a **30-minute** guided workflow.
 - Built and shared reusable **AI skills** for Jira execution, Snowflake analysis, and UAT workflows, freeing **3–5 hours per week** for engineers.
 - Ranked in the **top 2%** at Grab for AI tool usage; selected for Grab's Power AI users group, driving org-wide AI adoption across the **Payments division**.
 - Architected a centralized reconciliation platform unlocking end-to-end visibility across **50M+ daily transactions**.
 - Led real-time cross-organisation integrations with banks and consumer-facing applications, increasing annual revenue by **USD 3.5 million**.
 - Migrated critical applications from GCP to AWS with **zero downtime**, **20% cost savings** and **4× performance improvement**.
- Key Tech:** Golang, MySQL, Apache Kafka, AWS, Claude Code, Codex, MCPs

- UST Global – Senior Software Engineer, Platform Systems** India, Apr 2020 – Jun 2021
- Worked directly with the **CTO** and lead client stakeholder to deliver a healthcare insurance platform end-to-end, scaling to **50K+ users** and **USD 6 million** in annual revenue.
 - Upgraded and migrated the entire monolithic application to Java 11 in **one week**, ensuring backward compatibility and **zero production incidents**.
 - Designed a custom file ingestion framework, cutting integration time from **5 days to 1 day** via reusable parsing architecture.
- Key Tech:** Java, Spring Boot, MySQL

- Lothal Labs – Frontend Engineer, E-commerce Platform** India, Jan 2019 – Apr 2020
- Joined as **first engineering hire**; designed end-to-end app user journeys.
 - Led UI/UX design and created a reusable internal design library to standardize patterns and accelerate delivery.
 - Developed and tested cross-platform React Native mobile app (iOS/Android) with Redux-based state management.
- Key Tech:** React Native, Redux, AdobeXD

- Mindfire Solutions – Software Engineer** India, Jul 2016 – Dec 2018
- Delivered end-to-end web application for finance analysts, reducing manual reporting from **24 hours to 6 hours**.
 - Led a **team of 6 developers** and interfaced directly with clients for requirement gathering.
- Key Tech:** Java, Spring Boot, jQuery, Bootstrap, MySQL

PROJECTS

- Second Brain** | *Next.js, Go, Postgres (pgvector), Cloudflare* 2026
- Self-hosted personal knowledge app that ingests notes and sources, embeds them with pgvector, and makes them semantically searchable.
- simpledevutils.com** | *Next.js* 2026
- Secure, privacy-first collection of free developer tools (JSON formatter, JWT decoder, and more) serving **2000+ monthly unique visitors**.
- abhijitmohanty.com** | *Hugo, GitHub Actions, DigitalOcean, Apache* 2026
- Personal blog and portfolio built with Hugo, deployed via GitHub Actions with manual approval for production.
- plugsandsockets.org** 2025
- Reference resource for global electrical plug and socket standards: outlet types, voltage, and frequency by country; serving **2500+ monthly unique visitors**.

EDUCATION

National University of Singapore – M.Tech, Software Engineering • Won Best Internship Project among 200+ students for RTSP Web Player at ST Engineering. • Ranked 2nd among 140+ students in academic grades. CAP 4.41/5.00	Singapore, 2021 – 2022
--	------------------------

TECHNICAL SKILLS

Languages: Golang, Java, JavaScript
Frontend Libraries: React, Redux, jQuery, Bootstrap
Cloud & Streaming: AWS (EKS, Redshift), GCP (GKE, BigQuery), Apache Kafka
Build Tools: Git, Maven, Docker, Jenkins
Architecture: Distributed Systems, Microservices, High Availability
Java Ecosystem: Spring Boot, REST, Hibernate, JUnit
Databases: MySQL (RDBMS), Redshift, BigQuery & Snowflake (Analytics), DynamoDB (NoSQL)
AI & Automation: Claude Code, Codex, Cursor, MCPs, Skills
