PROFESSIONAL SUMMARY

Product focussed backend engineer with **10+ years** building **production payments and AI workflow systems**. Owns **discovery, scoping, build, rollout, and adoption** across ambiguous, high-stakes workflows; shipped LLM-powered tools saving **50+ engineering hours/month** and reducing onboarding from **3 days to 30 minutes**.

PROFESSIONAL EXPERIENCE

Grab, Singapore

Senior Software Engineer – Backend | Jun 2022 – Present

Tech Stack: Golang, MySQL, Kafka, AWS, Codex, Claude Code, MCPs

- **Proposed, scoped, and built CRP Bot** from recurring on-call pain points; **demoed to senior leadership and secured executive approval to convert it into a funded team initiative, saving 50+ engineering hours/month**.
- Extended CRP Bot with remote debugging and coding harness, enabling engineers to monitor logs, diagnose production issues, and **raise merge requests from mobile devices**.
- Rebuilt internal portal onboarding from dropdown-heavy forms into an AI-powered natural-language flow, **reducing onboarding time from 3 days to 30 minutes**.
- Built reusable AI skills for spec creation, code development, Snowflake data analysis, **saving engineers 3-5 hours/week** while standardizing repeatable AI-assisted investigation patterns.
- Selected for **Grab's Power AI Users group** to evaluate AI inference providers, coding agents, and engineering harnesses, converting practitioner feedback into **broader engineering developer tooling decisions**.
- Ranked in the **top 2% at Grab for AI tool usage** and currently scaling AI-assisted workflows across engineering teams in the Payments org.
- Built central reconciliation platform with visibility across **50M+ daily transactions**, recovering **USD 250K** in fund loss; led bank and consumer-app integrations unlocking **USD 3.5M annual revenue**.
- Migrated critical applications from GCP to AWS with **zero downtime**, reducing infrastructure cost by **20% (\$120K/year)** and improving performance **4x**.

UST Global (acquired Advalent Corporation), India

Senior Software Engineer – Platform Systems | Apr 2020 – Jun 2021

Tech Stack : Java, Spring Boot, MySQL

- Partnered with **Advalent CEO and client leadership** to **demo custom features, win deals**, and **integrate Advalent** into client systems; built **reusable ingestion** cutting integration from **5 days to 1 day**; scaled system to **50K+ users** and **USD 6M revenue**.

Lothal Labs, India

Founding Engineer – E-commerce Platform | Jan 2019 – Apr 2020

Tech Stack : React Native, Redux, AdobeXD

- **Joined as First employee ; handled design, app development, sales and marketing**
- **Led UI/UX design**; created a **reusable internal design library** to standardize patterns and accelerate delivery
- **Developed cross-platform consumer facing e-commerce React Native mobile app**
- Scouted potential **flagship-store locations** through field visits and **secured permission for one launch site** through negotiations with multiple site owners
- Story boarded, **shot and edited the flagship-store marketing campaign video** end to end.

Mindfire Solutions, India

Software Engineer | Jul 2016 – Dec 2018

Tech Stack : Java, Spring Boot, jQuery, Bootstrap, MySQL

- Worked with **client CTO and stakeholders** to build a **custom finance-analyst solution**; **led 6 engineers** from **discovery to delivery**, reducing reporting time from **24 hrs to 6 hrs**.

PERSONAL PROJECTS

[Second Brain](#)

AI knowledge system that turns saved X/Twitter bookmarks and YouTube videos into a **daily newsletter**, with **Neo4j knowledge graph** and **RAG chatbot** for live Q&A. Website link [here](#).

GitHub link [here](#).

Tech Stack: GPT-5.5/5.4, Go, Postgres, Neo4j, Exa Search

[DRAMA - Voice AI Council](#)

Real-time voice AI council that lets users discuss decisions with **multiple AI personas**, combining live speech, transcription, and persona reasoning. Website link [here](#).

Tech Stack: GPT Realtime, GPT-4o Transcribe

[SimpleDevUtils](#)

Privacy-first developer toolkit with **9 utilities**, including JSON Formatter and JWT Decoder, reaching **120+ monthly active users**. Website link [here](#). Github link [here](#).

[abhijitmohanty.com](#)

Technical blog and portfolio reaching **5.4K monthly unique visitors**, used to publish engineering notes, AI projects, and product write-ups. Blog link [here](#).

EDUCATION

National University of Singapore — *Master of Technology, Software Engineering*

CAP: 4.41 / 5.00
