Experience

Grab

Singapore

Senior Software Engineer – Backend

Jun 2022 – Present

Golang · MySQL · Apache Kafka · AWS · Claude Code · Codex · MCPs

- Built Slack and Atlassian MCP automations that removed repetitive on-call workflows, saving engineers ~3 hours per week.
- Revamped platform onboarding with natural-language input backed by LLMs, cutting a 2-day manual process to a 30-minute guided workflow.
- Built and shared reusable AI skills for Jira execution, Snowflake analysis, and UAT workflows, freeing 3–5 hours per week for engineers.
- Ranked in the top 2% at Grab for AI tool usage; selected for Grab's Power AI users group, driving org-wide AI adoption across the Payments division.
- Architected a centralized reconciliation platform unlocking end-to-end visibility across 50M+ daily transactions.
- Led real-time cross-organisation integrations with banks and consumer-facing applications, increasing annual revenue by USD 3.5 million.
- Migrated critical applications from GCP to AWS with zero downtime — 20% cost savings and 4× performance improvement.

UST Global

India · (acquired Advalent Corporation)

Senior Software Engineer – Platform Systems

Apr 2020 – Jun 2021

Java · Spring Boot · MySQL

- Worked directly with the CTO and lead client stakeholder to deliver a healthcare insurance platform end-to-end, scaling to 50K+ users and USD 6 million in annual revenue.
- Upgraded and migrated the entire monolithic application to Java 11 in one week, ensuring backward compatibility and zero production incidents.
- Designed a custom file ingestion framework, cutting integration time from 5 days to 1 day via reusable parsing architecture.

Lothal Labs

India

Frontend Engineer – E-commerce Platform

Jan 2019 – Apr 2020

React Native · Redux · AdobeXD

- Joined as first engineering hire; designed end-to-end app user journeys.
- Led UI/UX design and created a reusable internal design library to standardize patterns and accelerate delivery.
- Developed and tested cross-platform React Native mobile app (iOS/Android) with Redux-based state management.

Mindfire Solutions

India

Software Engineer

Jul 2016 – Dec 2018

Java · Spring Boot · jQuery · Bootstrap · MySQL

- Delivered end-to-end web application for finance analysts, reducing manual reporting from 24 hours to 6 hours.
- Led a team of 6 developers and interfaced directly with clients for requirement gathering.

Education

National University of Singapore

Singapore

Master of Technology, Software Engineering · CAP 4.41/5.00

2021 – 2022

Skills

Languages

Golang, Java, JavaScript

Frontend

React, Redux, jQuery, Bootstrap

Cloud

AWS (EKS, Redshift), GCP (GKE, BigQuery), Apache Kafka

Databases

MySQL, DynamoDB, Redshift, BigQuery, Snowflake

Backend	Spring Boot, REST, Hibernate, Microservices
AI / Automation	Claude Code, Codex, Cursor, MCPs, Skills
Tools	Git, Docker, Maven, Jenkins, Kubernetes

Projects

[Second Brain](#)

2026

Self-hosted personal knowledge app that ingests notes and sources, embeds them with pgvector, and makes them semantically searchable.

Next.js · Go · Postgres (pgvector) · Cloudflare

Personal ChatGPT

2024

Secure, full-stack personal ChatGPT instance with custom front end and local hosting.

Ollama · Llama 3.1 · Go · React

- Implemented backend and frontend with locally running LLMs.

Centralized Video Gateway

2022

Full-stack web app to onboard and manage IP camera feeds across enterprise zones.

Won Best Internship Project among 200+ students at NUS.

React · Java · WebRTC

- Built low-latency live video gateway managing CCTV feeds at scale, replacing proprietary licensed software and saving \$50K+ annually.

[abhijitmohanty.com](#)

2026

Personal blog and portfolio built with Hugo, deployed via GitHub Actions with manual approval for production.

Hugo · GitHub Actions · DigitalOcean · Apache

[plugsandsockets.org](#)

Reference resource for global electrical plug and socket standards — outlet types, voltage, and frequency by country.
